WORK EXPERIENCE

ITX - full time, remote
QA Trainee

07.2023 - present

Now I am involved in two projects. One of them is an online store with two websites and an application for android / ios. The tasks on the project are regular, interesting and urgent. The second project is a Financial Platforms. A set of landing pages with information and content about trading and other financial transactions. It does not receive tasks every day and does not require much time, but these tasks are of high priority and urgency. Below I will describe details what tasks I have performed on that projects.

- Creation of test documentation
- Collecting statistics on Contextual Advertising
- Measuring the loading speed of banners
- Functional and Non-functional Testing
- Smoke and regression testing
- Cross-platform and multi-platform testing
- Localization testing
- Mobile testing (Web application - prod/stage)

Viyar - full time , office
Sales manager

01.2019 - 04.2022
